MEDICAL DEPARTMENT

OF THE

TULANE UNIVERSITY OF LOUISIANA.

Formerly { 1834-1847 Medical College of Louisiana.
1847-1884 Medical Department, University of Louisiana.

CATALOGUE FOR 1902-1903. CIRCULAR FOR 1903-1904.

WITH NOTICE OF THE COURSE IN
PHARMACY OF THE MEDICAL DEPARTMENT.

THE CHARITY HOSPITAL OF LOUISIANA.
TULANE AVENUE, BETWEEN HOWARD AND LOCUST STREETS, NEW ORLEANS,
TWO SQUARES FROM THE BUILDING OF THE MEDICAL DEPARTMENT.

AND WITH
ANNOUNCEMENTS
OF THE

ACADEMICAL DEPARTMENTS OF THE UNIVERSITY.

FEB 7 1917

NEW ORLEANS:
The L. Graham Co., Ltd. 715-717 Perdido St.
1903

THIS CATALOGUE IS PUBLISHED ANNUALLY IN JUNE.

TULANE UNIVERSITY OF LOUISIANA.

(*Formerly, 1847-1884, the University of Louisiana.*)

PRESIDENT OF THE UNIVERSITY,

EDWIN A. ALDERMAN, LL. D.

ADMINISTRATORS.

His Excellency W. W. HEARD, *Governor of Louisiana.*
Hon. J. V. CALHOUN, *Superintendent of Education.*
Hon. PAUL CAPDEVIELLE, *Mayor of New Orleans.*
} *Ex-Officio.*

Hon. CHAS. E. FENNER, *President.*

———————— *First Vice President.*

R. M. WALMSLEY, *Second Vice President.*

J. W. CASTLES.
WALTED D. DENEGRE.
JNO. DYMOND, JR.
E. H. FARRAR.
HENRY GINDER.
CHAS. JANVIER.
J. B. LEVERT.
JAMES MCCONNELL.
J. C. MORRIS.
ASHTON PHELPS.
HON. D. C. SCARBOROUGH.
WALKER B. SPENCER.
WALTER R. STAUFFER.
BEVERLEY E. WARNER, D. D.

Members of the Faculty and Other Officers.

STANFORD E. CHAILLÉ, M. D., LL. D. Dean.,
Professor of Physiology, Hygiene and Pathological Anatomy.

ERNEST S. LEWIS, M. D.,
Professor of General and Clinical Obstetrics and Diseases of Women and Child.

JOHN B. ELLIOTT, M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

EDMOND SOUCHON, M. D.,
Professor of Anatomy and Clinical Surgery.

LOUIS F. REYNAUD, M. D.,
Professor of Materia Medica, Therapeutics and Clinical Medicine.

RUDOLPH MATAS, M. D.,
Professor of General and Clinical Surgery.

A. L. METZ, M. Ph., M. D.,
Professor of Chemistry and Medical Jurisprudence.

Lecturers, Instructors and Demonstrators.

P. E. ARCHINARD, M. D.,
Demonstrator of Microscopical Anatomy and Bacteriology.

HENRY BAYON, M. D.,
Demonstrator of Anatomy.

LUTHUR SEXTON, M. D.,
Lecturer and Clinical Instructor on Minor Surgery.

EDW. W. JONES, M. D.,
Lecturer and Clinical Instructor on Diseases of Eye, Ear, Nose and Throat.

ISADORE DYER, M. D.,
Lecturer and Clinical Instructor on Diseases of the Skin.

O. L. POTHIER, M. D.,
Assistant Demonstrator of Microscopical Anatomy and Bacteriology.

H. S. LEWIS, M. D.,
Demonstrator of Obstetrics

S. P. DELAUP, M. D.,
Assistant-Demonstrator of Anatomy.

M. S. SOUCHON, M. D.,
Assistant-Demonstrator of Anatomy.

J. B. ELLIOTT, Jr., M. D.,
Lecturer and Clinical Instructor on Physical Diagnosis.

E. D. FENNER, M. D.,
Lecturer and Clinical Instructor on Diseases of Children.

H. P. JONES, M. D.,
Assistant-Demonstrator in the Chemical Laboratory.

H. B. GESSNER, M. D.,
Demonstrator of Operative Surgery.

JNO. F. OECHSNER, M. D.,
Assistant-Demonstrator of Anatomy.

J. J. ARCHINARD, M. D.,
Assistant-Demonstrator of Microscopical Anatomy and Bacteriology.

GEO S. BEL, M. D.,
Lecturer and Clinical Instructor on Physical Diagnosis.

W. M. PERKINS, M. D.,
Assistant-Demonstrator of Operative Surgery.

RALPH HOPKINS, M. D.,
Instructor in Physiology, Hygiene and Pathological Anatomy.

J. B. GUTHRIE, M. D.,
Instructor in Materia Medica and Therapeutics.

A. WIRTH, M. Ph.,
Demonstrator in Charge of the Pharmaceutical Laboratory.

JNO. SMYTH, M. D.,
Instructor and Demonstrator in the Laboratory of Minor Surgery.

WM. W. BUTTERWORTH, M. D.,
Lecturer and Clinical Instructor on the Practice of Medicine.

A. C. EUSTIS, M. D.,
Assistant-Demonstrator in the Chemical Laboratory.

Chiefs of Clinic and Assistant Clinical Instructors at the Charity Hospital.

Obstetrics and Gynecology	E. H. WALLET, M. D. C. N. CHAVIGNY, M. D. I. I. LEMANN, M. D.
Practice of Medicine	P. E. ARCHINARD, M. D. W. W. BUTTERWORTH, M. D. S. LOGAN, M. D. OTTO LERCH, M. D. J. B. GUTHRIE, M. D.
Surgery	C. L. HORTON, M. D. MARION S. SOUCHON, M. D., FELIX A. LARUE, M. D. H. B. GESSNER, M. D. J. LAZARD, M. D.
Diseases of the Skin	RALPH HOPKINS, M. D.
Physical Diagnosis	H. B. ORR, M. D.
Diseases of Children	CHAS. A. BOREY, M. D. G. K. LOGAN, M. D.

MEDICAL DEPARTMENT.

1. This institution, founded in 1834 as the "Medical College of Louisiana," became in 1847 the "Medical Department of the University of Louisiana," and in 1884 the "Medical Department of the Tulane University of Louisiana." It is the oldest Medical College in the Southwest, and has the greatest number of alumni. May, 1902, it had conferred diplomas on 3985—namely, on 3646 graduates in medicine and 339 graduates in pharmacy.

2. The next annual course of instruction in this department, now in the sixty-ninth year of its existence, will begin on Thursday, October 22d, 1903, (28 weeks).* The Commencement will be held on Wednesday, May 5th, 1904, There will be only four holidays—Christmas, New Year, Mardi Gras, and Founders' Day. The first week of the term will be devoted especially to Clinical Medicine, Surgery, Obstetrics and Gynecology in the wards and amphitreatre of the Charity Hospital, and to practical work in the laboratories of Practical Anatomy (Dissecting Rooms), of Chemistry, of Pharmacy, of Histology and Bacteriology and of Minor Surgery. These laboratories will be open for instruction on Monday, October 26th, 1903.

Recent Improvements.

3. The antiquated amphitheatre, erected in 1847 in the Charity Hospital, was replaced in 1895 by a model building, seating more than 400 students, and admirably adapted to the exacting needs of modern surgery, as also to the greatly improved instruction of medical students.

The Library of the Medical Department was, in 1896, reorganized and replenished as a library of reference, to the great advantage of students, alumni and the medical profession.

The Milliken Memorial, an annex to the Charity Hospital, was opened in 1899 for the accommodation of 200 sick children, thereby increasing the great educational value of the Charity Hospital.

New Building With Its Laboratories.

4. The Medical Department has, since October, 1893, occupied a new site, twice the size of the former one and only two squares from the Charity Hospital, and thereupon has been erected a four-story building (three stories above a most excellent basement), which provides ample accommodations for larger classes and for all the needs now requisite to medical education; larger and better lecture and recitation rooms, and, best of all, ample and well-equipped laboratories for Chemistry, for Pharmacy, for Practical Anatomy, for Operative Surgery, for Microscopical Anatomy, Pathology and Bacteriology, and working rooms for Practical Physiology and for gross Pathological Anatomy. These admirable laboratories, now added to the unrivalled practical advantages for clinical, anatomical, and pathological studies given by the Charity Hospital, enable the Medical Department to provide its students with unsurpassed advantages for their medical education.

For other details of the new building see pages 3 and four of the cover.

Educational Advantages Throughout the Year.

5. During the intervals between the annual sessions, as well as during the sessions, the Dissecting Rooms and the Charity Hospital are both open to stu-

*All who intend to become medical students are warned against crediting unfavorable and exaggerated statements concerning the health of New Orleans; and are assured that during the sixty-eight years' existence of this college no student has ever died of yellow fever during the lecture term, which always occurs at a season when this disease is no longer to be feared and when New Orleans is as healthy as are other large cities.

dents who have been duly registered and have paid the matriculation fee, $5, for the next session; they are thus enabled throughout the year to prosecute the practical studies of utmost importance, viz.: Anatomy and Clinical Medicine, Surgery, etc., as indicated in paragraph 6.

Clinical Instruction at the Charity Hospital.

6. The faculty solicits the special attention, not only of students, but also of graduates of other colleges, to the unequalled clinical and anatomical advantages of the Medical Department.

It is universally admitted that without abundant anatomical and clinical material no medical school, however numerous or eloquent its professors, can possibly fit its pupils for practical professional life. It is scarcely necessary to state that it is only in large cities that such advantages can be procured, but it is of paramount importance that the opportunities there afforded should be properly utilized; that the students should be required, under the direction of the teacher, to examine patients for themselves, to keep record of cases, to note daily changes which may occur, and thus acquaint themselves by personal observation with the progress and termination of diseases and accidents. The mere introduction of a patient into an amphitheatre, and the discussion of his case by the professor in the presence of a large class, is no substitute for bedside instruction, such as is offered by the great Charity Hosiptal of New Orleans; and no reduction of lecture fees, not even their entire abolition, can possibly compensate for the lack of such opportunities. The use of the wards of this noble institution, with its *nine hundred beds,* and the annual occupancy thereof by from nine to ten thousand patients, and the use of the two clinical buildings, with about twenty thousands annual out-door patients, have been given by acts of the Legislature to the professors of the Medical Department of the Tulane University of Louisiana, for the practical instruction of its students, not only in Medicine and Surgery, but also in Obstetrics and Gynecology. Medical students are given access to the Charity Hospital, without payment of any hospital fees, and far better opportunities for the study of diseases therein than are usually enjoyed in the hospitals of other cities. For the study of the diseases of the Southwest, and also of the diseases of the negro race there is no field comparable to the wards of this hospital. Between the building of the Medical Department and the Charity Hospital there are only two squares, which distance is readily walked in three minutes.

The following table of 8793 cases treated in the wards of the Charity Hospital during the year 1902 will give some idea of the great advantages possessed by the Medical Department for the practical study of Medicine and Surgery:

Diseases.	No. of Cases.	Diseases.	No. of Cases.
Fevers and other general diseases	1459	Tumors	323
Respiratory organs	892	Bones and joints	256
Nervous system	616	Toxic diseases	63
Circulatory organs	397	Skin	78
Digestive organs	877	Eye	220
Genito-urinary organs	624	Ear and nose	24
Women (246 obstretrical cases)	672	Local diseases and injuries	1797
Venereal	473	All other diseases	22
		Total	8793

There were 1,116 deaths and 252 births, and a daily average of 615 in-door patients. In addition to 8,793 in-door patients, there were 21,129 out-door patients, to whom 79,263 consultations were given. In addition to these, there were 4,228 accident cases attended in the Surgical Amphitheatre. The 21,129 out-door patients furnished for instruction the following valuable material, viz.: medical cases, 5,359; surgical, 5,855; nervous, 211; venereal and dermatological, 2,243; diseases of children, 2,506; eye, ear, nose and throat, 2,755; dentistry, 495.

It should be noted that the sum total of all cases treated in 1902 in the Charity Hospital was 34,150.

Of the grand total of in-door and out-door patients in the Charity Hospital 12,978 were colored. There are sixteen wards for females. Of the fifty-two wards in the Charity Hospital there are twenty-three medical, fourteen surgical, two obstetrical and two gynæcological wards, two for children, four for diseases of the nervous system, two for venereal diseases, two for diseases of eye and ear and one for skin diseases; and all of these wards are accessible to students.

There are besides two admirable two-storied clinical buildings for out-door patients. Each of the buildings is subdivided into eight different services and seven of these are alike in both buildings, viz.: A service for medical cases; for nervous diseases; for surgical cases; for venereal and skin diseases; those of the eye; of the ear, nose and throat; and for cases of dentistry. In addition to these seven services the "Men and Boys' Clinic" has a surgical service for boys, and the "Women and Children's Clinic" has a gynæcological service.

The unequalled advantages of the Charity Hospital, as one of the greatest schools in the world for practical instruction, were notably increased in 1899 by the addition of the Milliken Memorial: a superb, modern and model building for the accommodation of 200 sick children.

It is manifest that these facilities for *genuine* clinical teaching, which recent improvements in the hospital have greatly increased, are now unsurpassed by any medical college in the United States.

7. The professors and clinical instructors are Attending Physicians or Surgeons of the Hospital, and visit their wards daily, accompanied by the students, who are thus brought into immediate contact with the sick and wounded, and are taught practically auscultation and percussion, analysis of urine, the use of the microscope in diagnosis, the application of dressings, etc. Surgical operations are performed and lectures delivered upon selected cases in the amphitheatre of the hospital.

Special clinical instruction is given to the candidates for graduation and to all students, who are for this purpose divided into classes and assigned to the respective professors and clinical instructors, in charge of wards of the hospital. The classes thus formed interchange courses so that all students enjoy equal advantages. Competent Chiefs of Clinic aid the clinical teachers in developing this system of instruction.

The regular lectures at the Hospital, on Clinical Medicine, by Professors Elliott and Reynaud; on Surgery, by Professors Matas and Souchon, and on Obstretrics and Diseases of Women and Children, by Professor Lewis, will be delivered in the amphitheatre, daily, between 8:30 A. M., and 12 M.

Post-mortem examinations are made in the presence of the class by the Professor of Pathological Anatomy.

Diseases of the Eye, Ear, Nose and Throat are taught in the wards and amphitheatre of the hospital, and constitute a part of the curriculum of the surgical chair.

Special instruction in diseases of the skin, diseases of children, physical diagnosis, minor surgery and obstretrical manipulations is given by the Lecturers on these subjects.

8. The Administrators of the Charity Hospital elect annually, by competitive examination in March or April, sixteen resident students, from the fourth

year class, who have passed all third year requirements. These students are entitled to board and lodging in the institution free of charge. The Administrators also elect seventeen externes, who serve as assistants in the out-door clinics. Four internes, who must be graduates, are elected annually by the Administrators of the Touro Infirmary.

Lectures and Laboratories.

9. *Lectures.*—Systematic didactic instruction will be given daily, immediately after the Hospital clinics, in the new building of the Medical Department on Canal street, between Villere and Robertson Streets, only two blocks from the hospital. The means for illustrating the didactic lectures consist of numerous models in wax, papier mache, plaster and wood of rare and beautiful workmanship, executed in London, Paris and Florence expressly for the Medical Department; very many tables and diagrams; a complete series of specimens in materia medica; surgical and obstetrical instruments and appliances; a large collection of natural, anatomical and pathological specimens and preparations, and a set of chemical and physical apparatus.

In addition to other usual methods of teaching anatomy, Prof. Souchon illustrates his lectures with very instructive and attractive colored lantern-slides; a method thus far special to this college.

Chemical Laboratory.

10. This laboratory readily accommodates ninety-six students working at the same time, and two courses therein are obligatory. These two courses are graded, and both are devoted to teaching such knowledge of chemistry as will prove of greatest service to the practicing physician. The first course is devoted to general chemistry, and the second course to physiological and medical chemistry. The Chemical Laboratory is under the direction of the Professor of Chemistry, aided by Drs. H. P. Jones and A. C. Eustis, Assistant Demonstrators.

Pharmaceutical Laboratory.

11. This laboratory is thoroughly well organized and possesses a complete outfit for practical instruction. It is under the directorship of Adam Wirth, Master of Pharmacy. See also paragraphs 39 to 44.

Microscopical Laboratory.

12. This laboratory readily accommodates one hundred and twenty-two students working at the same time, and two courses are obligatory. The first will be a complete course on normal histology, and the second will be on pathological histology, bacteriology and clinical microscopy. This laboratory is in charge of Dr. P. E. Archinard, a pupil of Pasteur and Koch, assisted by Drs. O. L. Pothier and J. J. Archinard.

Laboratory of Practical Anatomy.

13. This laboratory is unusually well ventilated and lighted, and is the largest of all the laboratories, allowing more than two hundred students to dissect at the same time. It is in charge of Dr. H. Bayon, assisted by Drs. S. P. Delaup, M. S. Souchon and J. F. Oechsner. Demonstrations of the cavities and of the viscera are given on specially prepared subjects. First-course students are given preparatory instruction on Osteology and Arthrology by Dr. M. S. Souchon, and are supplied with boxes of bones which they are permitted to study at their rooms.

Miles Laboratory of Operative Surgery.

14. The instructors in charge are Dr. H. B. Gessner, Demonstrator, and Dr. W. M. Perkins, Assistant Demonstrator. The entire field of General Operative Surgery will be gone over, the steps of each operation being first admirably illustrated by means of an Electric Optical Projector and fully explained by the Demonstrators, after which the students, in sections, will perform the operation in the presence of the Demonstrators and the class. Quizzes and reviews, supplementary to the laboratory work, are added to this course, and have proved most useful.

Laboratory of Minor Surgery.

15. This laboratory was first organized and equipped in 1901 by Dr. R. Matas, Professor of Surgery. In it a systematic course of demonstrations and individual exercises in minor surgical procedures, including first aid to the injured and in emergencies, will be given by Dr. John Smyth, the Demonstrator in Charge. The course will consist of three demonstrations a week for first-course students, and one or more weekly demonstrations, in more advanced studies and procedures, for second-year students. The aim of this course will be to prepare the student, by a series of personal experiences in the laboratory, and by actual manual training in the application of the elementary and fundamental procedures of minor surgery, for the more intelligent and rational application of the knowledge acquired in the surgical out-door clinics of the Charity Hospital to which he is introduced by a special clinical instructor in his second year of study.

Requirements for Matriculation.

Every student before being matriculated for the first course of Medical Lectures shall be required to possess the following qualifications:

16. He shall hold a certificate as the pupil of some known reputable physician, showing his moral character and general fitness to enter upon the study of medicine. (See form No. 1.)*

17. He must possess a diploma of graduation from some literary or scientific institution of learning; or a certificate from some legally constituted High School, General Superintendent of State Education or Superintendent of some County or Parish Board of Public Education, attesting that he has been examined and is possessed of at least the educational attainments required of first-grade teachers of public schools, or a certificate that he has passed the entrance examination to a State university. (See form No. 2.)

18. A set of tickets, showing that the holder has attended one full course of medical lectures in any regular and recognized medical college, is essential to matriculating for a second course of lectures; and every student, prior to matriculating for a third or fourth course of lectures, shall be required to show by similar evidence that he has previously taken two or three courses of lectures.

19. The following classes of students may apply for advanced standing and obtain it, provided every applicant undergoes a satisfactory examination upon every branch below the class desired to be entered:

(a) Graduates of Pharmacy, of Dentistry, and of Veterinary Medicine.

(b) Graduates and matriculates of Colleges of Homeopathy and of Eclectic Medicine.

(c) Graduates of recognized Colleges and Universities, who have completed therein prescribed courses in elementary branches of medicine, including Chemistry and Biology.

Advanced standing is granted solely from the first to the second year, and is conditioned on the completion prior to graduation of *all* of the required laboratory courses, including those of the first year (see paragraph 26).

Dear Sir:

I have examined Mr. .....

of ..... and find his scholastic attainments equal to those requisite for a first grade teacher's certificate in our public schools.

Yours,

.....Supt. Pub. Education.

Studies and Subjects for Examination in Every Year.

N. B. The special attention of students of all four years is called to paragraph 26.

20. Studies and Examinations of the First Year.

(a) *Studies:* Medical Physics, Chemistry and Toxicology, Anatomy, Demonstrations of Pathological Anatomy, Physiology and Hygiene, Materia Medica, Physical Diagnosis in the Hospital wards; Chemistry (general), Practical Anatomy (dissecting) and Minor Surgery in these three Laboratories.

(b) *Examinations* will be required during, or at the close of the first year, by the Professor of Chemistry, and by the Instructors of Physiology and Hygiene, of Materia Medica and of Physical Diagnosis, and records of satisfactory attendance and knowledge in the laboratories of Chemistry, of Practical Anatomy, and of Minor Surgery will be also required.

21. Studies and Examinations of the Second Year.

(a) *Studies:* Chemistry, Toxicology and Organic Chemistry (including physiological and medical chemistry), Anatomy, Pathological Anatomy, Physiology and Hygiene, Materia Medica, Physical Diagnosis and Minor Surgery in the Hospital wards; and Minor Surgery, Practical Anatomy and Histology in these three Laboratories.

(b) *Examinations* will be required during, or at the close of the second year, by the Professors of Chemistry, of Anatomy, of Physiology, Hygiene and Pathological Anatomy and of Materia Medica; bv the Instructors of Physical Diagnosis and of Minor Surgery (advanced); and records of satisfactory knowledge and attendance in the laboratories of Practical Anatomy and of Histology will also be required. Final examination in Pathological Anatomy may be advantageously deferred to the third or even to the fourth year.

(c) Examinations at the close of the second year on the "Primary Branches"—Chemistry, Anatomy, Physiology, Hygiene, Pathological Anatomy and Materia Medica—will be final, if satisfactory, and, if not, a second trial will be granted at the next examination. However, the Professors of Chemistry, Anatomy, Physiology and Pathological Anatomy will not vote, at the close of

the fourth year, in favor of any candidate for graduation unless he has completed the following laboratory courses, viz.: for Chemistry, two courses in a chemical laboratory; for Anatomy, two courses in a laboratory of practical anatomy, and two courses in a microscopical laboratory; for Physiology and for Pathological Anatomy, the same two courses in a microscopical laboratory (see paragraph 26).

Certificates that the above primary branches have been finally completed will not be given until the above laboratory conditions have been complied with. A fee of $15, in part payment of the $30 fee for "examination, graduation and diploma" (see paragraph 30) will be charged for any certificate given of satisfactory examinations on one or more of the primary branches.

(d) Students from other Colleges, who may enter the third or fourth year, but who have not passed the above primary branches in this College, will be given opportunity to undergo the examinations in said branches early in the session, and also at its close.

22. Studies and Examinations of the Third Year.

(a) *Studies:* Theory and Principles of Medicine, of Surgery, of Obstetrics and Gynecology (including Obstetrical Manipulations in normal labor), and clinical instruction in said branches; Physical Diagnosis, Therapeutics, Clinical Medicine and Diseases of the Skin in the Hospital wards; Chemistry (physiological and medical), and Pathological and Clinical Microscopy and Bacteriology in these two laboratories.

(b) *Examinations* will be required during, or at the close of the third year, by the Professors of the Practice of Medicine, of Surgery, and of Obstetrics, etc., or his assistant, and by the Professor of Therapeutics; bv the Instructors of Clinical Medicine, of Physical Diagnosis and of Diseases of the Skin; and records of satisfactory attendance and knowledge from the Laboratories of Chemistry, and of Bacteriology will also be required.

N. B. The final examination on Diseases of the Skin may be deferred until the fourth year.

(c) All students entering the third year will be conditioned on the primary branches specified in paragraph 21 of this catalogue (see paragraph 21 (d); and also upon the laboratories of the first and second year and on Minor Surgery, and on Physical Diagnosis, unless they submit to the Dean satisfactory evidence of having attended these two latter courses at other medical colleges.

23. Studies and Examinations of the Fourth Year.

(a) *Studies:* The Practice of Medicine, of Surgery, of Obstetrics and Gynecology (including Obstetrical Manipulations), and clinical instruction in said branches; Diseases of the Skin, of Children, and of the Eye, Ear, Nose and Throat, and Medical Jurisprudence; Operative Surgery in its special laboratory.

(b) *Examinations* will be required during, or at the close of the fourth year, by the Professors of the Practice of Medicine, of Surgery, of Obstetrics, etc., and of Medical Jurisprudence; by the Instructors of the Diseases of the Skin, of Children, and of the Eye, Ear, etc., and a record of satisfactory attendance and knowledge from the Laboratory of Operative Surgery.

(c) All students entering the fourth year will be conditioned on the primary branches specified in paragraph 21 of this catalogue (see paragraph 21 (d); and also upon Therapeutics, Minor Surgery, Physical Diagnosis, and any Laboratory Courses of the first three years not attended by them, unless they submit to the Dean satisfactory evidence of having attended these latter courses at other medical colleges.

Requirements for Graduation.

24. Every candidate for graduation must be of good moral character and must have attained the age of twenty-one years.

25. He must have attended, in a regular and reputable medical sollege, four full courses of lectures, of not less than six months in four separate years, and the last of these courses must have been in this institution.

26. Candidates for graduation must have taken (1) two annual courses of clinical medicine; (2) two of Practical Anatomy (dissecting); (3) two courses in a chemical laboratory, viz., one of general chemistry and one of physiological and medical chemistry; (4) two courses in a microscopical laboratory, viz., one of histology and one of pathological histology, bacteriology and clinical microscopy; and (5) one course in a laboratory of operative surgery. They must submit evidence of satisfactory attendance and knowledge of all these laboratory courses.

27. Every candidate for graduation must submit a thesis (composed exclusively by himself, on a subject within his own personal observation or research, and in his own handwriting) to the dean, between January 1 and March 1 of his last session; must have paid all college dues, including the graduation fee, and must pass satisfactory examinations before the members of the faculty.*

N. B. A candidate for graduation who may fail to pass satisfactory final examinations after three annual trials, will not be examined again.

Attendance on More than Four Annual Courses.

28. Students who have attended and paid for all of the required full courses, the last of which was in this institution, are thereafter entitled to attend the lectures and the hospital without charge for the professors' fees.

Fees.

29. The fees of this institution are now $580 for the four-year course.

Considering the exceptional advantages for practical instruction in hospital and laboratories, and the constant care and labor bestowed upon the pupils, the charges are as low as are compatible with the superior advantages given; and the faculty therefore appeal to their professional brethren throughout the Southwest to continue their support to an institution which does not seek to increase the size of its classes by pecuniary rivalry and discreditable underbidding, but by offering a full equivalent for its charges.

30. Table of Fees for Every Year of the Four-Year Course.

	1ST YEAR	2D YEAR	3D YEAR.	4TH YEAR
Matriculation	$5	$5	$5	$5
Professors, Lecturers, etc.	105	105	110	120
Practical Anatomy Laboratory	10	10	.....	.....
Chemical Laboratory	15	.....	15	.....
Microscopical Laboratory	.....	15	15	.....
Operative Surgery Laboratory	.....	.....	.....	10
Examination, Graduation and Diploma	.....	.....	.....	30
Total, $580, viz.	$135	$135	$145	$165
Breakage fees	5	5	10	

N. B. See paragraph 34 for Breakage Fees.

*The names of authors of very meritorious theses are publicly mentioned at Commencement. Students about to become candidates for graduation are urged to prepare their theses during the summer vacation.

A student who submits satisfactory certificates that he has attended in a recognized medical college and paid for the required laboratory courses, will not be charged the fees above specified for the courses previously taken.

The faculty reserves the right to decrease or to increase the above fees for the four-year course after the session of 1903-4; but it is not probable that the total fees of any one session will exceed $150.

Regulations as to Fees for Students.

31. All fees are payable on admission, except the graduation fee, $30, which is not accepted earlier than January 1st, nor later than March 1st. Ten dollars of this fee will be not returned to candidates for graduation who may fail to pass satisfactorily the final examinations.

32. Students who have attended and paid for the two courses that are obligatory for graduation in a Laboratory of Practical Anatomy (dissecting), will be charged only $5 (instead of $10) for an additional course; and students who have attended and paid the full fees for other obligatory laboratory courses, will be charged a smaller fee for any laboratory course voluntarily taken.

33. *Matriculation Fee.*—Every person, whether student or graduate, admitted to the privileges of this College, must pay a matriculation or registration fee of $5 for every session he may attend; and he will not be entitled to admission to either College or Hospital until registered.

34. *Breakage Fees.*—A breakage fee of $5 must be deposited for every course in the Chemical, in the Pharmaceutical, and in the Microscopical Laboratory, to reimburse needless injuries inflicted on the laboratories and their contents. The breakage fee will be refunded, in whole or in part, depending on the charges incurred by the student, at the end of the session, but will be forfeited if not claimed at the close of the session for which it was deposited.

35. Graduates of this College, and all medical students who have paid for all of the required full courses, will not be charged the professors' fees, but will be charged the matriculation fee and fees for all laboratory courses they may voluntarily attend. See paragraph 32.

36. Students who do not attend full courses, but only *partial* or *special* courses, must pay for the tickets of the professors whom they may attend, $20 each; and for other fees as in the Table of Fees, paragraph 30. Partial-course students are admitted at any time during the session.

37. Graduates of other recognized medical colleges must pay the matriculation fee, $5, and for the professors' fees, $70, and thereafter will be entitled to the same privileges given to the graduates of this College. See paragraphs 28 and 32. They can not, however, obtain its diploma without passing the final examinations, and without paying the graduation fee.

New Orleans Polyclinic.

38. Students of the Polyclinic, who are graduates of the Medical Department, are admitted to the lectures and clinical instruction of said department on payment thereto of $5 for its annual session; and Polyclinic students, who are not graduates of the Medical Department, will be admitted to the same privileges, during a six-weeks term of the Polyclinic, on payment of a fee of $15 to the Medical Department. All students of the Medical Department, graduating at the opening of or during a term of the Polyclinic, will be admitted thereto on payment of one-half of its regular rates. For further information in regard to the Polyclinic, address its secretary, Dr. Isadore Dyer, 124 Baronne Street.

Instruction in Pharmacy.

The University is also authorized by law to grant diplomas in Pharmacy, and the Medical Department has exercised this privilege since 1838, having now 339 graduates in Pharmacy.

39. The students in Pharmacy are required to attend two annual courses of lectures given by the Professors on Chemistry and Medical Jurisprudence, on Materia Medica and Therapeutics, and on Hygiene, and to attend one course in the Chemical and two courses in the Pharmaceutical Laboratory. They are not charged professors' fees after attendance on two full courses, but all students are charged for all laboratory courses, however numerous these may be, (see paragraph 32).

Instruction in the Pharmaceutical Laboratory is graded, and consists of a junior and senior course. These courses are designed to fit the students to conduct the process of manufacturing and of dispensing in the most thorough and economical manner.

40. Reputable women are admitted as students to the full course in Pharmacy on the same terms and conditions required of male students.

41. Pharmacy students are subjected to the educational "requirements for matriculation" enforced on medical students (see paragraphs 16 and 17), and all candidates for graduation in Pharmacy must comply with the requirements specified in paragraphs 24, 27 and 39, and must also submit to the Dean a satisfactory certificate of at least two years' practical experience under the instruction of a competent pharmacist.

42. *Fees.*—The charge for the first full course in Pharmacy is $75. viz.: For matriculation $5, professors' fees $35, chemical laboratory $15, and pharmaceutical $20; and for the second course $80 excluding the chemical laboratory, $15, and including the graduation fee, $20. In addition, every student must deposit a breakage fee of $5 for the Chemical, and $5 for the Pharmaceutical Laboratory, in accordance with paragraph 34.

43. Medical students who take a course also in Pharmacy are required to pay additional fees for only two courses in the Pharmaceutical Laboratory. Both of these courses (junior and senior) can be completed in one session. The student who has completed two annual sessions in medicine, and one, as above, in pharmacy, can become a candidate for graduation in pharmacy.

44. The Chemical and Pharmaceutical Laboratories will be open for instruction on Monday, October 26, 1903.

Text-Books.

45. The books mentioned below are recommended in preference to others; but *recent editions of any standard works* may be used in their stead. Only one text-book on each branch is indispensable. The cost of a set of text-books on all the branches is about $50. The prices affixed below are now the lowest prices of the cheapest copies, usually in cloth:

Dictionaries: Dunglison, $7.00; Gould's Student's, $2.50; Dorland, $5.00; Gould's Illustrated, $10.00.

Physics: Avery, $1.00; Gage, $1.25.

Chemistry: Simon, $3.00; Hammerstein Physiological Chemistry, $4.00; Witthaus' Manual, $3.25; Pellew, $2.25; Bloxham, $4.25.

Medical Jurisprudence: Reese, $3.00; Taylor (Bell Edition), $4.50.

Chemical Laboratory—Simon, $3.00; Metz, $——.

Pharmaceutical Laboratory—Remington's Practice of Pharmacy, $6.00; United States Dispensatory, $7.50; United States Pharmacopœia, $2.50; Caspari, $4.50; Coblentz, $3.50.

Microscopical Laboratory—Histology—Prudden, $1.25; Klein, $2.00; Medical Epitome Series of Lea Brothers & Co., $——; Piersol, $3.50; Bacteriology—Abbott, $2.75; Medical Epitome Series of Lea Brothers & Co., $——; Sternberg, $4.50; McFarland, $3.25; Pathological Histology—Green, $3.25; Coplin, $3.50.

Anatomy—Morris, $6.00; Gray (Colored Plates), $6.25; Holden, $3.00.

Pathological Anatomy—Green, $3.25; Stengel, $5.00; Schmaus, $——; American Text-book, $7.00.

Physiology—Brubaker, 80c.; Kirke, $3.00; Waller, $4.00; Foster, $4.50; American Text-Book, $6.00; Chapman, $4.25; Stewart, $3.75; Raymond, $3.00; Hall, $4.00.

Hygiene—Wilson, $3.00; Parkes, $4.00; Egbert, $2.25; Harrington, $4.25; Abbott's Transmissible Diseases, $2.50; Infection and Disinfectants, Rosenau, $2.00.

Materia Medica and Therapeutics—Bartholow, $5.00; White and Wilcox, $3.00; Hare, $4.00.

Practice—Flint, $5.00; Osler, $5.50; Pepper, $10.00; Loomis and Thompson, $20.00; Anders, $5.50; Thompson, $5.00; Tyson, $5.50.

Nervous and Mental Diseases—Gray, $4.75; Ranney, $5.00.

Diseases of Spinal Cord—Bramwell, $4.00.

Physical Diagnosis—Le Fevre, $2.25; Page, $2.00; Loomis, $2.50; Flint on Respiratory Organs, $4.50.

Dermatology—Crocker, $5.00; Stelwagon, $6.00; Schamberg, .80c.

Surgery—American Text-book, $7.00; Park, 3rd Ed. $7.00; International Text-book, $10.00; DaCosta, $5.00; Surgical Pathology—Senn, $5.00; Warren, $5.00; Tillman, $5.00; Minor Surgery—First Aid and Emergencies—Doty, $1.50; Pilcher, $2.00; Wharton, $3.00; Beck (Asepsis and Antisepsis), $1.25; Operative Surgery—Bickham, $——; J. D. Bryant, 2 volumes, $10.00; Zukerkandl, $3.00; Treves, Students' Handbook, $2.50; Stimson, $3.00; Venereal Diseases—Taylor, $5.00; Hyde and Montgomery, $4.00; General Reference—Dennis' System of Surgery, $24.00.

Diseases of the Eye—May $2.00; Haab, $3.00; Posey, $4.00; Noyes, $5.00; Nettleship, $2.25; DeSchweinitz, $5.00; Pyle & Gould, $.80c.; Ballenger, $2.50;

Diseases of the Ear—Burnett, $5.00; Bruhl, $3.00; Politzer, $5.00; Buck, $4.50; Bacon, $2.25; Bishop, $5.00; Gleason, $1.00.

Diseases of Nose and Throat—Sarjous, $5.00; L. Browne, $9.00; Seiler, $2.50; Gradle, $3.50; Grunewald, $3.00; Ball, $2.25; Ingalls, $4.50.

Obstetrics—Jewitt, $5.00; Playfair, $3.75; Hirst, $5.00; American Text-book, $7.00; Shaeffer, $3.00; Dorland, $4.00.

Gynaecology—Garigues, $4.50; Penrose, $3.75; Dudley, $5.00; Reid, $5.00; Montgomery, $5.00; Findlay, $——.

Diseases of Children—Taylor & Wells, $4.50; Holt, $6.00; Smith (J. Lewis), $4.50; American Text-book, $7.00. Orthopædic Surgery—Bradford & Lovett, $4.50; Whitman, $5.50.

STUDENTS PREPARING TO ENTER COLLEGE.

46. Are recommended to study especially Avery's or Gage's Physics; Simon's Chemistry; Morris' or Gray's Anatomy; Brubaker's and Kirke's Physiology, or any other standard works on these four subjects.

The study of physics is especially urged on all intending to enter a medical college.

EXPENSES, ETC.

47. Information about houses for boarding and lodging may be obtained by application to the Secretary. The price usually paid by students varies from $16 to $22 per month. A list of respectable boarding-houses is prepared shortly before the opening of the session and may be consulted by students, at the college, on their arrival in the city.

Students receiving remittances are advised to obtain them, if possible, in Express or Postal Money Orders or in checks upon New Orleans banks.

48. For any additional information address "Prof. CHAILLÉ, Dean, P. O. Drawer, 261." Letters thus *officially* addressed secure prompt attention even if the Dean be absent from New Orleans.

STANFORD E. CHAILLÉ, M. D., *Dean of Medical Department.*
New Orleans, La., *June,* 1903.

GRADUATES OF 1903.

At the Sixty-ninth Annual Commencement, held Wednesday, April 29th, 1903, the Annual Address was delivered by Prof. James W. Nicholson, A. M., LL. D., of the Louisiana State University.

Degrees were conferred on 91 graduates, viz., 82 in medicine and 9 in pharmacy, as follows:

GRADUATES IN MEDICINE—82.

NAME.	POSTOFFICE.	COUNTY.	STATE.
ADAMS, WILLIAM MATTHEW	Lapeer	Union	Arkansas
ALEXANDER, SILAS YOUREE	Greenwood	Caddo	Louisiana
*§BECHET, PAUL ESNARD	New Orleans.	Orleans	Louisiana
BEHRNS, CHARLES LEE	Cherokee	San Saba	Texas
BRAUD, FOREST CECIL (A. M.)	Donaldsonville	Ascension	Louisiana
BREMER, BENJAMIN FRANKLIN	Bearden	Ouachita	Arkansas
BROCK, JEPTHA LATAMORE (B. S.)	Dillon	Pike	Mississippi
BUCHART, EDWARD LOUIS	Evansville	Vanderburgh	Indiana
BURNHAM, HENRY MCCABE	Harpersville	Scott	Mississippi

THE TULANE UNIVERSITY OF LOUISIANA.

NEW ORLEANS.

EDWIN ANDERSON ALDERMAN, D. C. L., LL. D., PRESIDENT.

DEPARTMENTS:

GRADUATE DEPARTMENT, with advanced courses of study in all subjects.

COLLEGE OF ARTS AND SCIENCES, with Classical, Literary and Scientific Courses.

COLLEGE OF TECHNOLOGY, with Mechanical, Electrical, Chemical, Sugar and Civil Engineering Courses.

H. SOPHIE NEWCOMB MEMORIAL COLLEGE for Young Women, with Art and Boarding Departments. Brandt V. B. Dixon, LL. D., President.

LAW DEPARTMENT, Harry H. Hall, B. L., Dean.

MEDICAL DEPARTMENT, Stanford E. Chaille, A. M., M. D., LL. D., Dean.

The Graduate and Academic Departments of the University are located in the new buildings on St. Charles Avenue, opposite Audubon Park.

These departments are well equipped with libraries, museums, extensive laboratories, workshops and scientific apparatus. The facilities for instruction in Engineering are unsurpassed in the South. Tuition in the Academic Department is $85 per session, with small laboratory and other fees. There are more than 175 scholarships in the Academic Department open to Louisiana boys. Opportunities afforded for self-help. No worthy boy, if needy, shall be turned away from its doors.

The H. Sophie Newcomb Memorial College is devoted to the higher education of young women. The college buildings are situated in the best residence section of the city. The beauty of its situation and surroundings is unsurpassed.

The course of study extends over four years, and embraces full instruction in the language and the sciences. Special attention is given to Art instruction, in the Art Building, which offers exceptional opportunities for the study and practice of industrial and fine arts. There is a High School which prepares students for the college.

The tuition charge in the College is $90 and in the High School $75. Provision has been made for the accommodation of boarding students in the Josephine Louise House and The Gables, modern buildings provided with the most approved appliances for the care and comfort of their inmates.

The Law Department is, at present, located in Tulane Hall.* The standard of legal instruction afforded by the University has always been of the highest, and the studies prescribed, as well as the examinations and other tests exacted of the students, are designed to maintain that standard. The degree of Bachelor of Laws, granted by the University, entitles the holder on whom it is conferred to admission to the bar of this State without examination. The Faculty aim to prepare the students for admission to the bar not only of this State, but also in any of the Common Law States of the Union. The charge for lectures is $90 per session, payable in advance at matriculation.

For full information relative to the Medical Department see this circular.

For special circulars address the Deans of the respective departments. For general catalogue of the University address—

RICHARD K. BRUFF,
Secretary of the Tulane University of Louisiana.

---

*The location of this Department will probably be changed before the opening of the session of 1903-04.

DESCRIPTION OF THE NEW BUILDING.

ERECTED 1893.

The general plan consists of a central building to provide two large lecture rooms, one above the other; and of two wings, chiefly for laboratories, but also for library, museum, offices, recitation and private rooms.

An unusually well lighted, well floored, dry and commodious basement provides ample storage rooms, and also excellent rooms for the greater comfort of students, such as a study-room, smoking-room, etc.

The lecture-rooms, laboratories, and all rooms except those in the basement are free from all posts and pillars; the two lecture-rooms are abundantly lighted and ventilated, and having a seating capacity, the first floor lecture-room for 485, and the third floor amphitheatre for 525 students.

The Microscopical Laboratory is believed to be unsurpassed in lighting and ventilation, and in size, accommodating 122 students.

The students' Chemical Laboratory has the same size and superiorities.

The Dissecting Rooms are believed to be unsurpassed in all essentials, and can accommodate 204 students at work at the same time.

Lavatories and urinals are conveniently located on every floor.

The building supplies several private rooms for special work of students or graduates.

Lockers are amply supplied for the personal use of every student to secure his books, instruments, overcoats, etc.

The college lot measures about 256½ feet front on Canal Street, 199¼ feet on Villere Street, 313¼ feet on Robertson Street, and 102¼ feet on Customhouse Street; containing, therefore, about 62,764 square feet, while the building occupies only 16,528 square feet; thus leaving ample space for ornamentation and recreation grounds at present and for extension in the future.

ROBERTSON STREET, WEST SIDE

VILLERE STREET, EAST SIDE

MEDICAL DEPARTMENT, TULANE UNIVERSITY OF LOUISIANA

Fronting Canal Street, between Villere and Robertson Streets.

Dimensions, 176 by 123 feet depth. The central Building measures 76 feet front by 88 feet depth, and each wing 40 feet by 123 feet depth. [illegible]ing occupies 16,[illegible]28 square feet of the college lot, which contains 62,764 square feet.
